Sample Report Notes

Data sources and Assumptions

All clinical review information prepared by or for a quality improvement purposes is considered highly sensitive and restricted. Information produced during quality review such as opinions, audit results, interview reports, evaluations, and root cause analyses are considered restricted information. Material facts, even if not recorded elsewhere, such as on the patient record or an incident report are considered non-restricted information.

Data Source: Decision Support Data Warehouse. All data excludes Left Without Being Seen cases.

Date Range: January – December 2016

Benchmark column reports regional median for combined (i.e. aggregated to regional) facility level report and site median for site facility level report. Median column reports regional median. Previous Year's column is not populated due to change in data structure.

Statistics for any metrics where there is less than or equal to two Physicians in the peer group are excluded.

1) Total # of Patients Seen is straight counts based on the visit date being in the calendar year. LWBS visits are excluded.
