

Serious Illness Conversations in a time of COVID-19

Two webinars on Tuesday May 26

12-1pm or 1-2pm

For individuals with underlying health conditions or frailty, the time between diagnosis and *health deterioration can be especially quick if infected with COVID-19*. Many people may not have the luxury of time to think about their health care priorities and wishes. *Proactive conversations can help.*

Join the RPACE Community of Practice

Learn & share ideas together

Find solutions for challenges

Discuss palliative approach to care topics

How will this help your clinical practice?

We are inviting experts in the field **locally** and **internationally** to bring you the most updated practices

How can you get involved?
