

UBCH Renewal Project

April 2016

Where we are today

Inadequate ventilation for heat and air conditioning

Insufficient number of rooms for overnight sleep studies

Minimal soundproofing in sleep/test rooms

No wheelchair-accessible toilet or shower

Current Sleep Disorders Clinic/Lab

Total number of sleep/test rooms: 6

- Sleep Clinic and Sleep Lab operate in separate locations
- layout and distances between rooms in Sleep Lab compromise safety
- minimal soundproofing and inadequate ventilation in sleep/test rooms
- too few handwashing stations
- insufficient space and seating in clinic waiting area
- insufficient storage for patient files, equipment and supplies, and lack of appropriate area to clean soiled equipment
- lack of adequate staff amenities
- dated and cluttered environment

Turn the page to see where we want to be.

Where we want to be

New Sleep Disorders Clinic/Lab*

Total number of sleep/test rooms: 9

- ☑ multi-function exam/consult/sleep rooms enabling the Sleep Clinic and Sleep Lab to unite and enhance the continuum of care for patients
- ☑ three technologist testing stations adjacent to rooms for patient and staff safety
- ☑ appropriate soundproofing and ventilation to improve the sleep environment for patients and increase the accuracy of sleep tests
- ☑ more handwashing stations for improved infection control
- ☑ larger waiting area to accommodate more patients and people using mobility aides
- ☑ a secure file room to store active files and protect patient privacy, and clean and a soiled utility room for a safer, cleaner environment for patients and staff
- ☑ appropriate staff amenities, including lockers, multipurpose room and washrooms
- ☑ a welcoming and fresh clutter-free environment for patients, visitors and staff
